

ATTENTION

TIME/ALTITUDE AWARENESS GAME

2,500 ft	14 seconds
2,000 ft	11 seconds
1,500 ft	8 seconds
1,000 ft	5 seconds
500 ft	2.5 seconds

Did you know that at 2,500 ft at terminal velocity you are approximately 14 seconds above the ground.

Vital seconds could be eroded quickly by fumbling emergency procedures.

Spending too long playing with a malfunction or just plain lack of time/altitude awareness.

AT THE BEST, YOUR RESERVE WILL TAKE AROUND 400 FEET TO DEPLOY — This does not allow for a slow opening, pilot chute hesitations, etc.

**IT STARTS AND FINISHES
ON THE GROUND**
