

# Cutaway!

1200 ft ...

Small reserve, 120 sq.ft ...

"How do I sort out the brakes and slider?"

You've never used it before ...

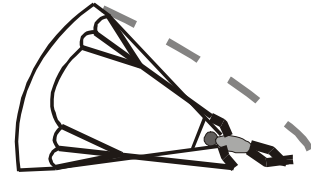

Where am I going to land?"

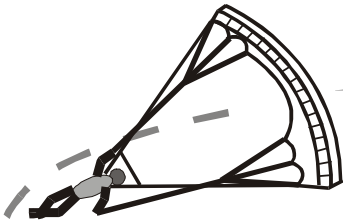

"Where's the stall point?"

"Where's my freebag?"

"How fast does it turn?"

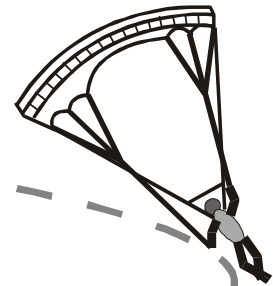

"Where's the drop zone?"

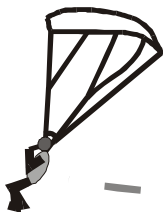

"Where's my main?"

"How sensitive is it to toggle movements?"

"What's the wind direction?"

40 SECONDS LATER ...

"How do I land it?"

Produced by the APF in the interests of safety

**Perhaps you don't know all the answers yet ...  
... But have you thought of all the questions?**
